RE: Richardson Flat Volumes

Kathy:

Please find attached four tables that report the volumes of material repositied in Richardson Flat. These tables include materials brought into the site for the years 2005 through 2009. I have also included forecasts from the various remediation and construction projects anticipated within the Silver Creek watershed. I have included those incomplete projects identified in a letter from the City to you dated July 2, 2007 as well as those additional projects identified in the new, undated letter from the Park City building department. I have not provided allowances for future homes in Prospector, but these have not and are not anticipated to generate large volumes of material.

During 2009, waste material was brought to Richardson Flat from essentially two sources: 37,368 cubic yards of material generated by the Montage Hotel project, and 8,520 cubic yards brought in by Park City Municipal Corporation from various projects around Park City. No material was brought from any Prospector homes during 2009.

The amount of clean material suitable for cover was down significantly during 2009, most likely reflecting the overall downturn in the housing and real estate development sectors of the local economy. This has resulted in a noticeable reduction in the stockpiles of clean material at the site. Nonetheless, I believe that there is currently more than enough material in the stockpiles to complete the Richardson Flat remediation project as well as a certain amount of material brought into the site and repositied from other sources.

I have received a new topographic map of the Richardson site and anticipate updating the storage plan for the site during the first quarter of 2010. I will let you know how that progresses. I have already received calls from various contractors wanting to

bring contaminated materials to Richardson Flat. The site will most like not open until June and is of course dependant on the weather. I will keep you informed when it is ready to accept material.

Sincerely,

A handwritten signature in black ink, appearing to read "Kerry C. Gee", with a stylized flourish at the end.
